Pittsburgh Chapter PSPE

Civil PE Mini Refresher - Spring 2022

To be better prepared for the Civil PE Review Course, the Pittsburgh Chapter offers a three (3) session Mini Prep Review Course which includes six (6) subjects prior to taking the Civil PE Review. This mini course is primarily for engineers who have already passed the EIT Exam, but feel a need to brush up on some subjects that are of importance for the Civil PE Review Course or for those who plan on taking the Mechanical PE Exam.

This mini course is being offered because we have found that many engineers have not used certain basic skills for some period of time and need a brief review to allow them to take full advantage of the material presented in the Civil PE Exam Review Course. Our goal is to give all students the best opportunity to be successful on the PE Exam. These sessions will review selected topics in mathematics, statics, strength of materials, physics, electrochemistry and engineering ethics.

WHEN: Thursdays from March 3 to March 17, 2022 from 6 PM to 9PM

WHERE: Virtual On-line Class

Cost: \$235 for 9 hours of instruction (minimum of 5 registrations). Registration closes Friday, February 25, 2022.

Please Visit: pittsburghpe.org/events for more information to register.
